Claresholm Local News

Mrs. W. McKenzie entertained at bridge on Tuesday evening.

Richard Hayter, of Stavely, is a patient in the hospital here since Tuesday.

Rin-Tin-Tin in "Jaws of Steel" at the Rex theater Monday and Tuesday next.

With an extra gang of men on good progress has been made this week on the skating rink.

Miss Ellen Nelson, whose home is at Red Deer, is a pneumonia patient at the hospital here since Sunday last.

Fred Watkins was the winner of first prize in Clark Bros' apple guessing contest. Mr. Barton winning second.

The ladies of St. John's Guild will hold their Xmas bazaar in the Odd Fellows' hall, Saturday, December 3, from 3 to 6.

Laura LaPlante in "Silk Stockings" at the Rex theater Friday and Saturday nights this week. From the play by Cyril Harcourt.

Gordon, two year old son of Mr. and Mrs. C. G. Gunderson was brought to the hospital last Saturday suffering from mastoid trouble.

To all lovers of the tea hour we offer delicious tit-bits and kindly welcome—Ladies of St. John's Guild, Saturday, December 3rd, from 3 to 6, I. O. O. F. hall.

On last Saturday afternoon Gay Laurie, the nine-year-old daughter of A. Laurie, manager of the Bank of Commerce, had the misfortune to break her right elbow. The children were coasting down a slide when she fell.

At a largely attended meeting of the teachers and officers of the United Church Sunday school, Laurie was appointed superintendent, December 23 was selected as the date for the Christmas entertainment and various committees appointed.

There is no dainty maiden—no charming hostess—who will not biver over her Xmas greeting if accompanied by a distinctive kerchief from the special handkerchief booth of St. John's Guild in the I. O. O. F. hall, Saturday, December 3rd, from 3 to 6.

A break in the cold weather came on Monday evening when a chinook set in, which continued until Friday morning when the wind turned to north and there was a drop in temperature, with snow flurries. The chinook cut the snow down greatly while it lasted.

A meeting of ladies who are hockey enthusiasts was held on Monday evening in the office of Mr. McLean of Macleod, to discuss forming a ladies' hockey team. It was decided to do so. Mrs. John Anderson was elected president, and Miss Gwen Foster as secretary. Miss Edna Rae was elected captain.

At the last meeting of the town council a communication was read from Mr. McLean of Macleod offering to give the town a milk service if it was protected in the matter of private vendors. The council accepted the offer and a motion was made to place a license fee \$50 and prepare a bylaw for next meeting covering various details to be effective from January 1, 1928.

Granum, Nov. 22—A flurry of excitement was caused when a gasoline stove burst into a sheet of flame, due to a faulty valve when in use at a dinner held in the old church hall. Monday evening. One of the first to act was the prompt action of Mrs. Peedie in pulling the window draperies clear of the flames prevented what might have been a serious and fatal blaze, as the stove was near the only exit, which is narrow. A large gathering of women were present.

DEATH OF SAM GIBSON

Sam Gibson, age 66, died in the hospital on Thursday morning having been ill for some time with brights disease.

He was born in Kirkmichael-Ayrshire, Scotland, in 1861, leaving home at the age of 16, going to Wales where he engaged in mining for four years. He spent 13 years in sea, went to Australia and from there to the Yukon during the gold rush of 1898.

From the Yukon he went to Washington where he homesteaded, and came to Alberta in 1907, taking up a homestead at Grass Lake, coming from there to Claresholm in 1920.

Of four daughters and two sons the deceased is survived by one daughter, Mrs. Flora Ferguson of Claresholm. He also leaves a sister, Mrs. Mary McSkimming, a nephew, Robert McSkimming, of Grass Lake, who has been here during deceased's last illness, and a niece, Mrs. Alex Hutchison of Claresholm.

The late Mr. Gibson was a member of St. Andrew's Society.

The funeral service will be held in the United church at 2 o'clock on Saturday afternoon. Interment in Claresholm cemetery.

A GREAT FAVORITE

People often wonder how it is that almost in every home they find a copy of the *Family Herald* and *Weekly Star* of Montreal is the favorite paper of the household. But when one thinks of the make-up of that great publication at the extremely low price of one dollar a week, it ceases to be a wonder. The *Family Herald* and *Weekly Star* is undoubtedly Canada's favorite, and Canadians are justly proud of it. It is a wonderful combination—newspaper, agricultural journal, and family magazine—all three in one, at a cost of two cents per week. Our readers can make no mistake by giving it a trial.

Did you know there were even greater surprises than usual in that popular "mystery table" of St. John's Guild? And the date—Saturday, December 3rd, from 3 to 6, I. O. O. F. hall.

The Bran Pie

"My name's Tommy. My mother sent me to bed last night without a supper because I had a bad dream. I had to sleep right away. And then—
I heard the most awful noise—hundreds and dozens of kids tramping to the Big Bran Pie. And there was a lady there—with the blackest hair and the blackest eyes. And she said, 'I wanted to see. Gosh! I bet my mother's sorry she sent me to bed. I might have grabbed one of those dolls for our baby—or maybe a watch for Dad!'" Try it December 3rd in the I. O. O. F. hall.

FOR SALE

Two sets heavy harness. Apply at Alex Hutchison's blacksmith shop.

FOR SALE

Six room house, lathe and plastered, light and water; on four lots—stable that will hold two horses, with a stable of Claresholm. Price \$1,800.00; \$500.00 cash, time \$100 on balance. Write Box 140, Barons.

STRAYED

Seven head of cattle—5 black mosaics, 1 red and white spotted, 1 red heifer. Branded T-7, on left hip; also copper T-7, on left hip; a wire run through left ear. Notify A. Sundquist, Phone 602, Stavely.

ORDER NOW

We are now taking orders for Christmas Cakes and Puddings. Mince Meat of our own make.

All our fruit is re-cleaned and greatest care is taken in choice of all ingredients used.

Call To Young Manhood To Go North, Where Canada's Greatest Wealth Is To Be Found

Premier Gardner of Saskatchewan, speaking from the summit of Grouse Mountain a few weeks ago, gave Canadians a message that was well worth pondering over. He gave men cause to reflect on the future of the Dominion, and he gave them encouragement from contemplation of the past.

The "little giant of Saskatchewan," as he has been described, himself a power of want to the prairie, and a son of a man who had the perseverance and determination we need to go up from the labor of a farm hand to the office of prime minister. Out of his knowledge of Canada and from his very personal experience he red a call ringing out to the young bloods of the nation, to "cut away from the ribbon that hugs the border, and go north where Canada's greatest wealth of natural resources is to be found."

Just as Horatio Gredry advised the young men of the eastern United States to "go west" and they went and built up the republic—so Premier Gardner calls for young Canada to go north, to the great fields of timber in the Northwest where vast spaces pine for the plough, and hidden metals lie waiting for the future prospector; where water powers are waiting energies that could be harnessed for the development of the land and the prosperity of the Dominion.

And Premier Gardner in palming the plow, the colors at the plow, and how the plow of other days had ventured forth from the eastern settlements to construct new homes and rear wondrous families that today are the pillars of our state.

His call was to men of energy, of vision, and of enterprise, and to such, he said, there must come response.

The nineteenth century, he said, belonged to the United States. The twentieth century, he said, and now in 1926 the population of Canada had equaled that of the United States just one century before; in 1911 the Dominion had a population almost double that of the United States in 1810, and in 1926—after nine years of warfare—had but a few thousand more of the number of people that the United States had in 1820. So, he continued, a comparison of conditions with the recent past shows that the Dominion was advancing just exactly one century behind the United States, and he set confidence in his return.

If Premier Gardner is true prophet, the Dominion is indeed the land of destiny and its progress in the next twenty-five years will be phenomenal. —Vancouver Province.

Crab Apples

May Be Grown Successfully In Western Provinces

Most varieties of crab apples are very hardy and will withstand severe winters, while the varieties are quite severe. This fruit is generally very popular for preserving and jelly-making purposes and finds a ready market. There are many varieties of crab, and some valuable ones are described in an experimental Farm bulletin on the "Cultivation of the Apple in Canada." A very profitable variety to grow is the Hyslop, which is very hardy and jelly-making and an excellent jelly and jelly maker. Another fine crab apple is the Marilla, which is large, highly colored and very hardy. One of the best known crab apples is the Transcendent, a handsome fruit with yellow color and very productive.

Mountain Sheep For British Columbia
Fifty Rocky mountain sheep have been sent to the British Columbia Game Conservation Board by the Canadian National Parks Branch of the Department of the Interior. These sheep were captured near Banff in Rocky Mountain National Park and they are used to stock a limited range of the species near Spence's Bridge, B.C.

Dr. N. Graham, veterinary surgeon, of Fort Macleod, has received word from Ottawa that he has been granted a copyright on his medicine "Theelin," which he claims to be a cure for tuberculosis.

The first municipal public conveyance was used in Nantes, France, in 1828. A few years later the omnibus was introduced in London.

About 500,000, which is one-fourth of the number of British, are still in employment.

Fight In London Zoo

Canadian Bison Kills American Bison In Hard Battle

A furious fight between a Canadian and an American bison took place at the London Zoo, the American animal being gone to the United States.

"Punch," who occupied an enclosure with three cow bison, was the victim and "Silly Bill," who shared a paddock with the "Lady," was the victor.

When no one was present, the reverse between the battling bison can only be conjectured, but with such power and destructive animals, it must have been awe-inspiring. Both weighed 2,000 pounds, but Punch, who was smaller of the two, was he younger and sturdier than Bill, his more massive, shaggy head was larger, as is characteristic of the Canadian.

In the morning, when he had been up from the bison, while in a far off corner lay the body of "Bill" with a large hole in the side and almost no life left in him. The bison was dead, well satisfied with his meal in a container about 5 inches in diameter and 20 inches deep. When the desired temperature is reached the water may be drawn off and cold water added. The water is then heated to cool the cream. When no steam is available, an ordinary wash boiler filled with water may be set on the stove and shot gun cans put in it. The cream is then heated, the water is heated, the boiler is heated, and cooling will be done more quickly and effectively when the cream is stirred. When the only difficulty is getting the cream to churn, then the water may be heated to 150 degrees. Heating to these high temperatures will give the butter a cold flavor, but it will soon pass away.

Heating should be done until all the cream should be heated to 150 to 180 degrees. Heating to these high temperatures will give the butter a cold flavor, but it will soon pass away.

Marks and stains upon a stone wall suggest that "Punch" had buried his bison antagonist against it.

Report Scandinavians Coming To Prairies

Five Thousand Are Expected To Arrive Next Spring

Arrangements are being made to bring 5,000 Scandinavian families to the prairie next spring, and the arrangements are made recently by Carl Jacobson, superintendent of the Scandinavian Colonization and Settlement department of the Canadian Stampede. Mr. Jacobson is serving a term which will be divided between Scandinavian countries, but he is returning to his home.

Mr. Jacobson is completing a tour of Western Canada in the interest of placing Scandinavian agriculturalists in the prairie. He has been well pleased with the district and will return to his home.

Mr. Jacobson is returning to his home after a tour of the prairie. The P. Burns Company, however, has the contract for the killing. The Wainwright herd increases rapidly in spite of the transfer to the far north of 5,000 of the animals.

ANSWERS TO LAST WEEK'S QUESTIONS

295. How Fast Is the Population of the U. S. Increasing?

One and one-half million a year; during the 19th century increased from 50 to 76 million 50 fold; during first 20 years of 20th century increased 40 per cent of that of the preceding century. From the Revolutionary War to the Civil War, increase averaged 35 per cent each decade; since then it has gradually declined, the current rate of increase being 50 per cent. From 1920 to 1930 increase will not likely exceed 40 million, and by the year 2000 population should be 175,185 million. Should the increase of the past decade continue, the U. S. will have in about a century a population equal to that of China today (460 million).

296. How Long Will There Be Enough Land?

Only about 40 per cent of the land area can ever be used for crops—all except about 300 million acres is now in use. Agriculture must be increased by more intensive cultivation, diminishing waste, in grain production and marketing, more intensive of pasture lands, a gradual shifting from so heavy a meat diet to one based more to cereals, vegetables, fruits and dairy products. The per capita consumption of meat products (170 lbs.) by average 50 years ago, when health could be improved, and the nation could double its population without diminishing its real welfare. The U. S. could feed and clothe 300 million people, but will double agricultural output whenever required.

297. How Long Will the World Have Enough Arab Oil?

150,000 persons are born every day, 100,000 die. The world's population is 1 billion, 750 million and increasing 20 million a year. Has trebled during the past 127 years, at present rate of increase will be 5 billion by 2027. The world has 13 billion acres of arable land, 100 million acres per person, can sustain but 5 billion people unless food production per acre is increased proportionately. The tropics and sub-tropics contain 4 billion acres of undeveloped land, 100 times as much as the temperate zone. Nature is generous in the tropics, and it is from there that the greatest increase in production will ultimately come.

298. What Is the Windiest Place in the U. S.?

A wind under 2 miles an hour is a "calm"; 2 to 12, "light breeze"; 13-23, "moderate wind"; 24-37, "strong wind"; 38-55, a "gale"; 56-74, "hurricane". Of the 6,000 stations reporting to the Weather Bureau the one on Point Keyes, a towering 500-foot headland into the Pacific about 30 miles north of San Francisco, has the highest average wind velocity. It is known to blow 50 gale for 9 days straight, 80 miles for 24 hours; Mt. Washington, Vt. (6,293 ft.), has the highest aver-

age during the winter season, 30 miles, has been known to blow 150 miles.

The Place Having the Least Wind?

There is always more wind in daytime than at night; windiest hour of day is 3 p.m., quietest just before sunrise. A gentle breeze leaves soil a little looser, 6-14 miles move small branches of trees. The Weather Bureau station at Roseberg, Oregon, has an average wind velocity of 3 miles an hour. Oregon and Washington, except along their coasts and over mountain peaks, are the quietest in the Union; as much can likewise be said of southern California.

300. How the Milk Supply Is Carried to the Cities?

Today American cities, except the very largest, receive fully 90 per cent of their milk by motor truck. The milk is transported in trucks operating within the 0.29 mile zone, 27 per cent 30-39 miles, 7 per cent travel routes 50 miles or longer. Rates charged are the same or a little higher than charged by the railroads, but this is compensated for by eliminating the city terminal transportation time and cost involved in getting the milk to the rural railroad station. In Detroit district, about 75 tank-trucks are engaged in transporting milk from collecting plants in the country to the city dairies.

301. Will the Motorship Displace the Steamship?

About 1875 steam began to displace sail; in 1910 the steam turbine began to displace the large reciprocating engine; next oil-burners began to supersede coal as fuel; and finally the introduction of the internal combustion engine gave many advantages of operation. Not instead of using the oil to heat the boilers to make the steam to drive the engines, the big, slow-running Diesel engine, with immense cylinders almost a yard in diameter, produces power direct by burning the mixture of oil vapor and air. Motorships of as

Overcharging The Tourists

This Practice Will Have Effect Of Discouraging These Who Contemplate Trips.

Few automobile highways the world over have witnessed the traffic that Canadian highways were called upon to bear during the past year. Every state in the American union rates its quota and in many Canadian cities there would at times appear to be as many United States cars on the streets as those from the Dominion. American tourists, however, in their features was the presence of cars from other Canadian provinces, indicating the fact that Canadian automobile travellers are beginning to appreciate the value of the Canadian roads and the comfort of the Canadian lodgings in their own country. The Dominion with its many distinctive regions offers a remarkable appeal for inter-provincial traffic—the quality, beauty and variety of its scenes, the unequalled diversity of its climate, the equally attractive northern areas where an empire is being won from the wilderness, through mining, pulp mill operations and so on; the vast and fascinating areas of the prairies and the great forests of the north; the great parks and woodlands; the magnificent Pacific slope where the roads lead through unending grandeur. Too few Canadians have seen all these phases of their country with the intimacy that motor car travel permits.

What are the impressions that are being carried by these visitors? Are they of a nature that will bring a return visit? Many and varied besides. Generally speaking, the climate is favorable and where comfort has been secured have centralized on a few principal points—condition of the roads, courtesy, accommodation and price.

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, which corresponds with thousands of United States tourists each year, in furnishing them with information concerning Canadian travel, reports that its correspondence shows that visitors are for the most part satisfied and pleased with Canadian hospitality. Allowances and expenses are very reasonable and comfortable protection is fully recognized; what complaints are made are usually over lack of suitable accommodation (except in the larger centres) and over the cost of food. There have been some very definite accusations as to the latter, to instance a car owner charged \$5.00 for a minor repair that did not justify 50 cents. Fortunately, however, the Canadian tends to respect local circumstances to the provincial government authorities and the latter acting quickly and the rough had soon arranged for a refund by the shopkeeper.

A return visit is fairly typical of those received from the president of a New York State bank.

"From time to time I have been receiving sectional maps from your department, showing the routes of travel in Canada. I have passed these on to people who have been taking trips in your good country, and they are very much appreciated. Our people like to travel in Canada, in fact I made a trip to the lake section north of Kingston."

"Personally I have no complaint to make, but I have heard a number of people speak of the exorbitant charges being made by the people in the States this year over last season and other seasons. You have the people coming this year and if you wish to continue this they had better curb their avocation."

It is noted from the above letter that the overcharging is largely a development of the past year and unless it is checked up with sudden and ceaseless vigilance it will work serious damage to the future of tourists to Canada, for tourists travel with surprising swiftness among these travellers, due to the exchange of experience each evening in the tourist camps. Our best good plan for protection is to inquire into prices before they make purchases.

Municipal officials and merchants should take a genuine interest in seeing that visitors get a square deal in the big cities, and the provincial authorities should not hesitate to report charging cases so that some check may be made and the charges investigated.

Huge Elevator Capacity

There are 4,499 country grain elevators in Western Canada, one-fifth of which are owned or controlled by the Wheat Pool. Next year, the pool will build a larger terminal and by the end of 1923 expect to own one-third of the total. The Saskatchewan Pool plans to build 200 new grain elevators, mostly at rates of \$10,000 and \$12,000, increased by 10,000 bushels this year.

W. N. U. 1795

Winter Protection of Roses

All Except the Hardy Varieties Require Attention Before Cold Weather Sets In

Roses hybrids, Australian brists, Province of Canada roses, Danish roses and Mexican roses little or no winter protection in most parts of Canada, but other roses must be protected except in very favored territories. The following are the rules to be used in different parts of the country as clearly outlined in a bulletin on Hardy Roses distributed by the Publications Branch of the Department of Agriculture, Ottawa. In the case of the Canadian rose, the bulletin says, in the Prairie Provinces, where the country is open, it is desirable to bend some of them down and cover them with burlap and place evergreen boughs over them. This can be done in the fall. For Hybrid Perpetual, Hybrid Tea and Tea roses more protection is necessary. A simple method of protecting Hybrid Perpetuals and Hybrid Tea roses is to bend them over and tie them in such a manner that protection of the lower part of the stem. Even if the tops are killed back the lower stem is almost sure to remain alive. In addition the plants may be bent over and have evergreen boughs over them. Boughs are not usually pulled back severely, they may be entirely covered with soil to preserve them. Where the soil is not sufficient a mixture of straw, straw manure, or leaves should be used. Evergreen boughs might be tried. Good results are obtained, when other methods fail, by bending the bushes over and covering them with burlap and then further protection is obtained by bending down, putting over them a box without cover or bottom, filling it with dry leaves and putting a cover over the box which should be watertight. Tea roses are particularly tender and should be bent over and covered with a box without cover or bottom, filling it with dry leaves and putting a cover over the box which should be watertight. Tea roses are particularly tender and should be bent over and covered with a box without cover or bottom, filling it with dry leaves and putting a cover over the box which should be watertight.

French people are greatly loved in France," Miss Metcalf said. "They never forget a national hero. The name of every soldier in France is on record in some parish church; the story of their life is told in the cemetery. The many magnificent war memorials point to every school of modern French art. The cathedral at Arras has an entirely rebuilt of four stone walls. The French are almost embarrassingly grateful to Canada, not only because, as a Frenchwoman put it, 'The Canadians came at once,' but because of the splendid conduct of the Canadian soldiers while in France.

Woman Was Hard Hitter
Knocks Prisoner Down in Identifying Him As Alleged Assailant

Looking over robber suspects at a Chicago police station, a 10-year-old girl suddenly stepped forward, delivered a left uppercut, followed it with a right smash to the jaw and dropped one of the prisoners for a count of three.

"Get the man," she cried. His is the one who choked me, tore rings from my fingers and tried to shoot my sixty-year-old son yesterday," Thus was Louis Tisano saved.

That was Louis Tisano's life.

Arranging for Centennial
Belgium is making active preparations for the gathering of independence for the exhibition to be held in Antwerp in 1920. The same time will be celebrated the hundredth anniversary of the laying of the first railroad line in Belgium and in Europe, and also the jubilee of the foundation of the Free State of Belgium.

Invitations to participate are being extended to other countries.

Some flappers' faces are not as bad as they're painted.

Better Methods In Surgery

Wonderful Operations Now Possible

A man may go successfully about his work minus a leg, an arm, an eye, part of a tooth, a bladder, a kidney, part of his lungs and brain and as much as 12 feet of his intestines! Dr. J. F. Erdman, New York, is authority for the statement. He told the American Medical Association that the number of operations of a human being can afford to let the knife is steadily increasing, due to better methods in surgery and increased knowledge of the functions of organs.

Recent developments he said were operations on the heart, the removal of entire lobes of the lung and the removal of the gall bladder.

Love Their Native Land

People Of France Never Forget a National Hero

Color and beauty and have come back to us again," said Dorothy McCann of London, Ont., just returned from two months study in Paris. She and the other members of her party, all either teachers or students, bent on further study, were as popular as the French. French government during their stay. In so far as special privilege to visit places not usually open to tourists was concerned, there was no question.

"French people are greatly loved in France," Miss Metcalf said. "They never forget a national hero. The name of every soldier in France is on record in some parish church; the story of their life is told in the cemetery. The many magnificent war memorials point to every school of modern French art.

The cathedral at Arras has an entirely rebuilt of four stone walls.

The French are almost

embarrassingly grateful to Canada, not only because, as a Frenchwoman put it, 'The Canadians came at once,' but because of the splendid conduct of the Canadian soldiers while in France.

Canadian Indians As Agriculturalists

A report of the Canadian Department of Indian Affairs states that agricultural conditions on the reserves in Ontario have very much improved in the last five or six years. There is a good growth in agriculture, particularly in the prairie provinces, during the present time than there were a few years ago. The number of stock on some of the reserves has more than doubled.

Dusky Shopper—"Ah wants an alarm clock an' a rasah sirop."

Clark—"Yes, madam."

Dusky Shopper—"An' would you kindly make holes in de strap?" Ah's going to make mab husband a wrist watch."

"When I started in life," said the successful man pompously, "I realized that my motto should be 'Get behind me, Satan.'"

"Excellent," murmured a listener. "There's nothing like starting with a backbone."

The large species of flying fish, found off the coast of California, can fly as far as 200 yards, according to "Liberty."

Establishing "Brain Pantheon"

Idea Of Russian Professor Approved By Soviet Government

Death will not bring privacy and peace to the brains of the illustrious citizens of Russia. If that is the case, the Soviet Government has approved by the Soviet Government.

The plan, already partially in operation, calls for the establishment of a "brain bank" in which the bodies of deceased celebrities will be kept, like soffit, in glass bowls attached to which will be gold plates telling whose brain is inside and what its peculiarities are. But he who has been buried will be disected, microscopically examined and their characteristics tabulated in the hope that they may thus continue to serve humanity after death.

The "brain pantheon" is the idea of Professor Vladimir Bortchitsky, psychiatrist and hypnotist, who told the Associated Press that the brains of the three Russian celebrities are being kept in his care and that Fedor Chaliapin has willed his brain to the new institution.

The brains of Anton Rubenstein, the pianist, are to be preserved in a glass jar, and the chemist, whose work on penicillin has been of great benefit to the world, will be buried in a casket. The brain of the famous Russian scientist, before his death in 1907, and Alexander Herzen, writer, artist and ranking member of the Academy of Science, who died in September, form the nucleus of the pantheon.

Explaining the purposes of the plan, Professor Bortchitsky said: "Our brains will be used in two ways: first, to preserve the brains of immortals as sacred relics; thus satisfying the emotions; second, to study the relation between high gifts and the formation of brain cells and glandular secretions."

Praise For Western Farmers

Saskatchewan Live Stock Branch Has Underaken Work

At the request of the Saskatchewan Sheep Breeders' Association and the Saskatchewan Swine Breeders' Association, the Provincial Live Stock Branch has undertaken to inspect and grade sheep and swine throughout the province, particularly rams and hounds that will be offered for sale this fall. Circulars have been sent out by the association to all stockmen enclosing application for rams to be filled in by those who desire stock graded.

In its letter the Sheep Breeders' Association points out that the system of grading rams by the Live Stock Branch is endorsed by the association.

Parbered rams, possessing size, type and quality, with good feed and sufficient breed characteristics to recommend them as sires for purebred herds, are called star rams. The old gentleman turned over a half-breed ram, thinking to gain himself from the angry bull, "You brute," he spittered, shaking his fist at the animal, "I've been a vegetarian all my life."

The large species of flying fish, found off the coast of California, can fly as far as 200 yards, according to "Liberty."

Was Insignificant Pawn

Man Who Threw Bomb Which Started World War Died Practically Unknown

Milan Zigonovitch is dead. Who was not one of the thousand culprits? Yet it was his act that brought on the greatest holocaust in human history, that brought death to millions and suffering to millions more. He was born in the obscure sordid village of Sarajevo, Zigonovitch and his compatriots threw the bomb that killed Archduke Francis Ferdinand of Austria. The World War followed.

It is now known that the death of the archduke was not the cause of the war, that it was merely an excuse for war. There had been bombardments of Sarajevo, but the Sarajevo bomb-throwers struck, and their costly acts did not result in war. The roots which blossomed so evilly lay deep under the surface. Europe was not prepared for war, but the Sarajevo bomb-throwers furnished the spark. He was an insignificant pawn in the chess game of international politics, and the bomb he threw resulted in the death not of one man but of millions. So much greater were the tragic results of his deed than the immediate results of his act.

The brains of Anton Rubenstein, the pianist, are to be preserved in a glass jar, and the chemist, whose work on penicillin has been of great benefit to the world, will be buried in a casket. The brain of the famous Russian scientist, before his death in 1907, and Alexander Herzen, writer, artist and ranking member of the Academy of Science, who died in September, form the nucleus of the pantheon.

Saskatchewan Live Stock Branch Has Underaken Work

At the request of the Saskatchewan Sheep Breeders' Association and the Saskatchewan Swine Breeders' Association, the Provincial Live Stock Branch has undertaken to inspect and grade sheep and swine throughout the province, particularly rams and hounds that will be offered for sale this fall. Circulars have been sent out by the association to all stockmen enclosing application for rams to be filled in by those who desire stock graded.

In its letter the Sheep Breeders' Association points out that the system of grading rams by the Live Stock Branch is endorsed by the association.

Parbered rams, possessing size, type and quality, with good feed and sufficient breed characteristics to recommend them as sires for purebred herds, are called star rams, and have three stars tattooed in the left ear.

Fairly good purebred rams which may possess size, fair type and quality, but which are somewhat lacking in breed characteristics are called two star rams, and have two stars tattooed in the left ear. These rams are recommended for use in grade flocks.

Fairly good rams which are called one star rams, and tattooed with one star in the left ear. They are generally lacking in size or quality or vigor and are recommended for use in the average grade flock.

Development Of Aerial Photography

Notable progress has been made in Canada in the employment of oblique and vertical aerial cameras and the use of the latter has made possible the mapping of the Dominion. By special arrangement the Topographical Survey Branch of the Department of the Interior is the central clearing house for aerial photographs in Canada, and aerial photographs being on the in-

formation of the Department of Customs uses them to advantage in the prevention of smuggling.

Manitoba Fox Show

Manitoba's first fox hunt will be held in Winnipeg on November 23 to December 3. Manitoba now has a large investment in ranch-bred foxes. Ranch equipment runs into several hundreds of thousands of dollars, and the hunt will be a success. Good ranch-bred foxes in the prairie section of the larger ranches having between 400 and 500 foxes each.

Canadian Granite For Press Boxes

Granite quarries have been in operation in Canada for many years producing building stone, monumental stone, and paving blocks, but it is only in recent years that some from certain quarries has been employed for press rolls on paper-making machines.

British Columbia Tobacco

Latest report indicates that 750,000 lbs. of tobacco of various kinds were produced in British Columbia this year from approximately 1,000 acres. It is expected that 2,000 acres will be planted next year.

Germany's coal output is increasing

Now Occupies First Place

Canada Is Far In Lead In Export Of Wheat

Sir Henry Row, world-famous grain expert in the Financial Times, reviews the grain trade of the world and says the war's disturbance of international commerce was especially marked in the grain trade, and that never again with the flow of grain from exporting countries return to the old groove.

Before the war wheat came from mainly seven sources—24 per cent from Russia; 12 per cent from Argentina; 10 per cent from Canada; 8 per cent from the United States; 7 per cent from India and Australia; and 6 per cent from Australia.

Last year's proportions were: Canada, 52 per cent; Argentina, 18 per cent; Russia, 10 per cent; Australia, 10 per cent; Hungary, 8 per cent; India, 6 per cent; and Bulgaria, 6 per cent.

Three-fifths of the world's barley comes from Canada, with the United States one-fourth. Russia has dropped out in all these categories, while the war, she was an important exporter.

Changes in buyers are also noted. Britain remains the chief buyer of all grain, but Japan has entered the market, and Italy, France and Germany are the world's next, while Belgium and Holland are big importers, but it is largely re-exported.

Germany and Britain are the big buyers of wheat, and France takes 25 per cent, Germany nearly as much, and France half as much. Spain buyers are Germany, 8 per cent; and France slightly more, while Spain, Norway and Italy have also increased corn requirements.

Chance Of Success Great

Wonderful Opportunities For Young Men Today Says Edith

Thomas H. Johnson, 26, who at the age of 80 in his youth, would be glad to live his life over again with all his disappointments and successes, he declared in a radio interview which was carried by the New York Times from coast to coast.

The first formal appearance of the electrical wizard before the microphone was in an interview which was part of a radio program celebrating the 40th anniversary of his invention of the incandescent lamp.

He believed the incandescent lamp to be the most important of all his inventions.

He had no advice for the nation's youth, "for youth does not take advice." He did believe, however, that the opportunity for a young man today are "far greater than at any time in the past."

Use Of Aircraft In Canada

In addition to the forest, survey, engineering and mining work done by Aerials in Canada, the Department of Marine and Fisheries is directly interested in the use of aeroplanes in fisheries protection work along the Pacific coast; the Department of Agriculture uses them in fighting insect pests; and the Department of Customs uses them in the investigation of smuggling.

Comdg. B Squadron, 2nd A.M.R.

According to the latest Bulletin of the Bureau of Agricultural Economics, Washington, Canada's rank-and-file British Empire is produced in the British Empire's grand Empire, and tobacco is the largest British market since September 1st, 1926, and is the largest in the world. The tobacco in Canada has increased from 14,232,000 pounds in 1925 to 1926, and the number of smokers is increasing about 75 per cent of the product, and Quebec most of the remainder.

Gasoline has done all the damage to the horse population in Canada, according to W. J. McCallum, horse importer of Brampton, Ontario. The horse population in Canada recently on the Canadian liner "Metagama." Mr. McCallum brought 100 horses to Canada, and the animals which he purchased throughout the British Isles, France and Belgium, were all in excellent condition. He will take the valuable shipment west this winter and will dispose of the horses to the best of his knowledge. Mr. McCallum is optimistic regarding the future of the horse population in Canada, and believes that more pure-bred animals are needed on this side of the water.

C.P.R. Plans Two New Musical Festivals

See during the Piping Contest - Banff Springs Hotel in the background. Harold E. Key, appointed musical director of the C.P.R.

specimens of the handiwork at which they are so skilled. The summer solstice is associated with folk dancing, the Canadian National Air Race and an account of that race will be selected as the most appropriate for the first meeting. The other Festival will be devoted to Sea music and will take place for the variety of its sea songs, sea music, sea stories with sea chanteys. Other Festivals at other suitable points are also being planned to include musical gatherings. The Folk-music competition announced for next year will be included in the musical Festivals.

Mr. Key has decided to repeat both these Festivals next year, with the intention of establishing them as permanent gatherings. The Folk-music competition announced for next year will be included in the musical Festivals.

Mr. Key has made a reputation in Canada as a folklorist, Composer, and conductor. He has an authority on choral music and singing, and has directed two additional Festivals for 1928. One of these is the Newfoundland Folk Craft Festival at Winter Haven, and the other is the International Folk Festival at Winter Haven, Ontario.

Mr. Key has organized the musical Festivals. He has invited Mr. Johnston, Deputy Minister of Marine and Fisheries, to western Canada and to display

Another PRICE Suggestion

Maple Nut Cake and Chocolate Layer

THIS unusual, economical Maple Nut Cake will keep fresh for several days, and the Chocolate Layer cake is made in a little different way than Dr. Price's Cream Baking Powder, is a family favorite too. Try one or both of them today!

(All measurements for all materials are level.)

MAPLE NUT CAKE

14 cups shortening
1 cup light brown sugar
2 eggs
14 cups milk
112 cups flour
14 teaspoons baking powder
14 teaspoons Dr. Price's Baking Powder
14 cups maple nuts—preferably pecans
1 teaspoon vanilla extract

Cream shortening, add sugar slowly, beat well, add flour, and beat well, add flour, salt and baking powder together, add eggs, add milk, then remainder of flour and beat well. Cover top with maple icing and sprinkle with maple nuts while still soft.

MAPLE ICING

14 teaspoons butter
3 tablespoons hot milk

Cream shortening, add sugar slowly to make a stiff icing, add flavoring, beat well, then remainder of flour and beat well. Cover top with maple nuts while still soft.

CHOCOLATE FILLING AND ICING

8 cups flour
14 teaspoons baking powder
14 cups sugar
14 cups milk
14 cups flour
14 cups Dr. Price's Baking Powder
14 cups vanilla extract

Add flour, sugar, milk, and baking powder to cream shortening, then remainder of flour and beat well. Cover top with chocolate filling.

Chocolate layer cake has moderate oven 15 to 20 minutes. Put together with

Made from Cream of Tartar, derived from grapes. Raises the dough perfectly, giving the food fine texture and rich flavor.

MADE IN CANADA

Send for FREE Cook Book—"Table and Kitchen"—149 Notre Dame East, Winnipeg, Can.

112 cups confectioner's sugar
12 teaspoons Dr. Price's Baking Powder
14 cups maple flavoring
14 teaspoons maple flavoring
Add flour, sugar, milk, and baking powder to cream shortening, then remainder of flour and beat well. Cover top with chocolate filling.

To start add boiling water very slowly to make a smooth paste; add vanilla, melted chocolate and cream, then beat well between layers and on top of cake.
